

FORGE & COMPONENTS
DEVELOPPEMENT DE PIECES DE FORGE & FONDERIE

Selection of the appropriate technology after study

Advising and assistance in the development of your parts:

In-depth study of the most suitable technology. We optimize a solution with you according to your specifications. We have partners in the following fields :

- Steel and stainless steel lost wax casting • Steel and stainless steel hot forging
- Steel and stainless steel cold forging • Aluminium die-casting
- Aluminium injection casting

Our partners for investment casting of steel and stainless steel are located in China and India, as well as for aluminium die-casting. Hot and cold forging of steel and stainless steel is carried out by our European partners. Our German partner Kaiser handles aluminium die-casting technology.
